Holy Cross Energy Garfield County Solar Array

Garfield County Airport Solar Array facts:

858 kW (3,575 - 240-watt panels)

Five acres at the Garfield County Airport in Rifle, Colorado

Projected Annual Output: 1,500,000 kWh, \$170,000 of savings, 2.7 million lbs. of CO2 saved

Lifespan: 50 years

GRAND VALLEY POWER SOLAR FARM

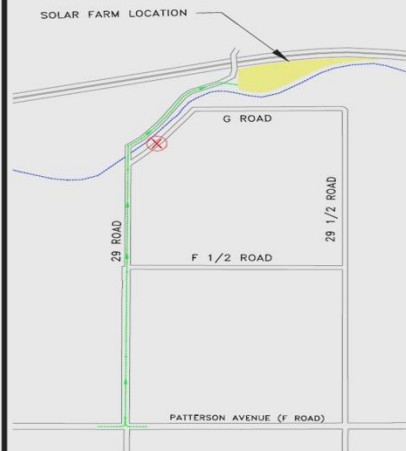

Grand Opening

August 12, 2011

Highline Substation, 714 29 Road, Grand Junction, CO

Grand Opening - community solar farm / 20.68 kW / 88 panels
Time - 10:00 am

**Come join us in celebrating the first
member-owned renewable energy
system in the Grand Valley.**

A Touchstone Energy® Cooperative

Project Partners:

Poudre Valley REA Carter Lake Hydroelectric Project (2.6 MW)

San Miguel Power Association Ouray Hydroelectric Project

Uncompahgre River Hydro (900 kw)

Humphrey's Dam hydro (310 kw) project - San Luis Valley REC

Delta-Montrose Electric Hydro Project (6 MW)

Williams Four Corners Waste
Heat Recovery Project (5.8 MW)
La Plata Electric Association

Highline Electric Waste Heat Recovery Project (4 MW)

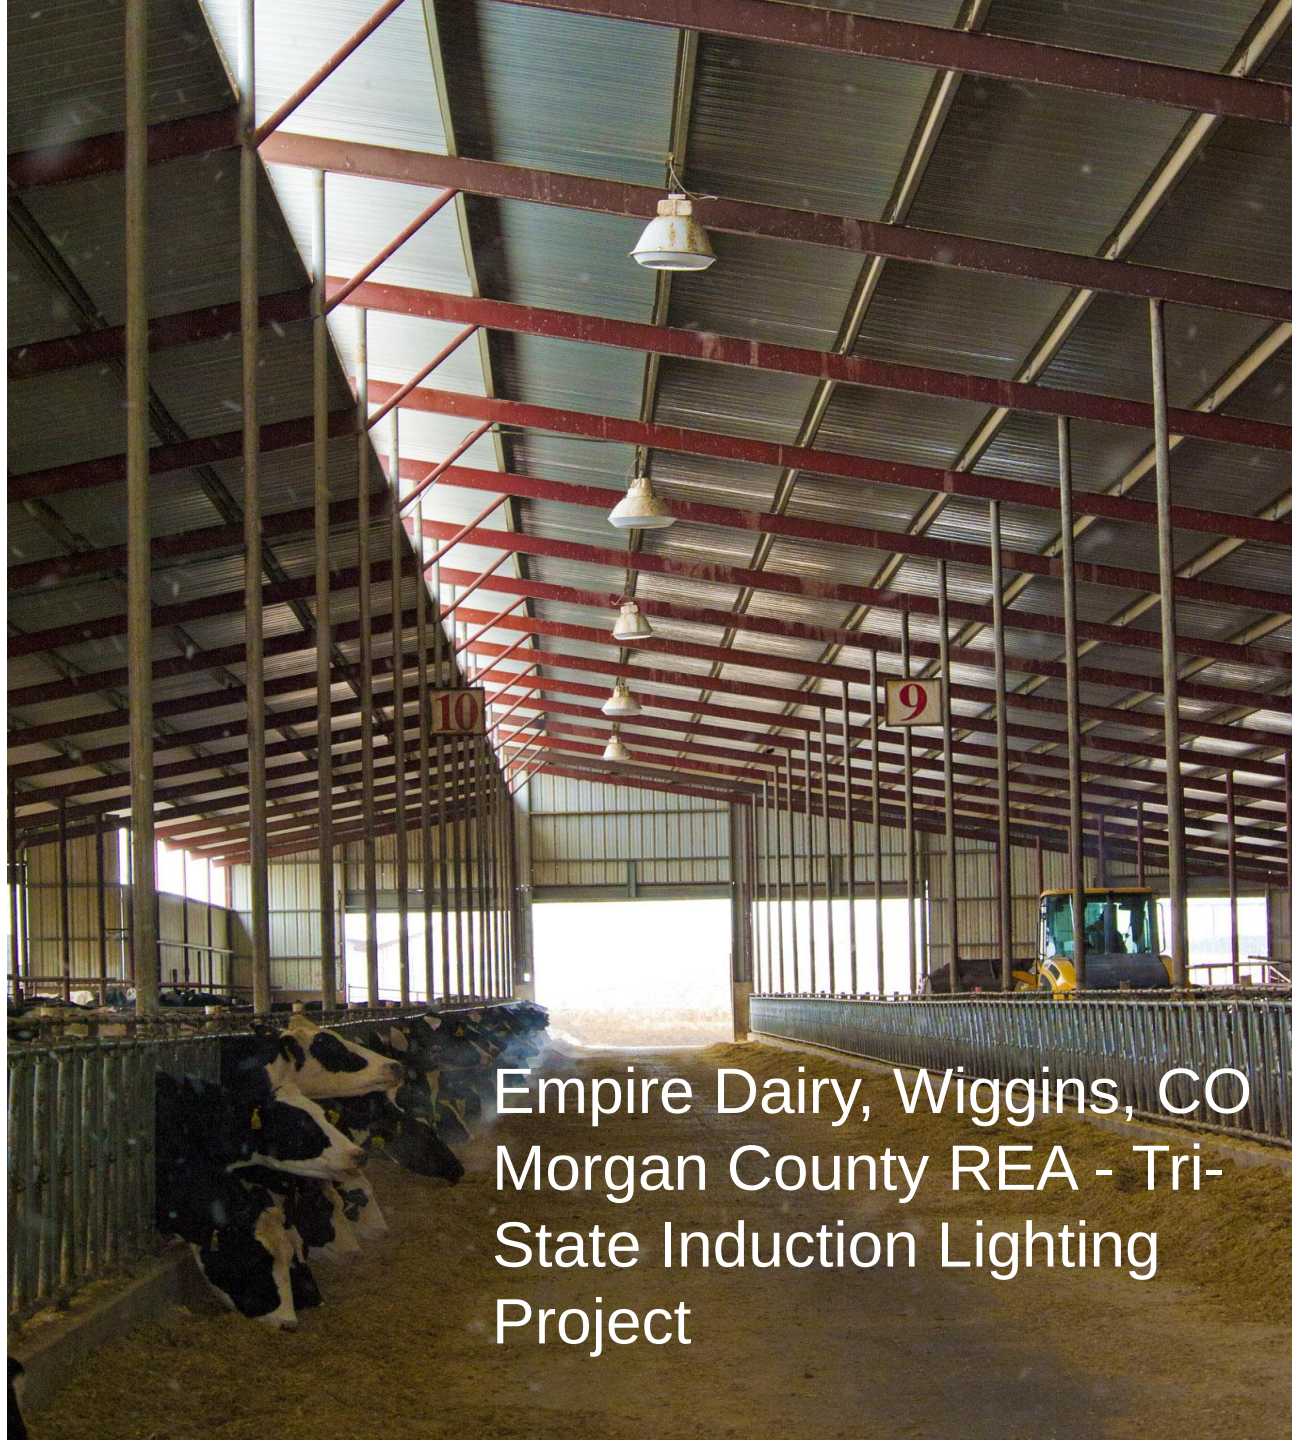

United Power's Erie Landfill Gas to Energy Project (3.2 MW)

methane
project – 3
MW

Engineers Don Willbanks, left, and Jay Thompson inspect the pipeline carrying methane gas from the nearby Oxbow Mine in Somerset. As part of the 3MW LLC project owned by Aspen Skiing, the gas will be converted to electricity and used to power Aspen Skiing's operations. *(Photos by Chris Council, Aspen Daily News)*

Morgan County REA - Tri-
State Induction Lighting
Project

A photograph of an office interior. The ceiling is a drop ceiling with several long, rectangular fluorescent light fixtures. A fire alarm bell is mounted on the ceiling. In the foreground, there are cubicles with white partitions. A large green plant is visible on the left. In the background, there are more cubicles, a desk with a computer monitor, and a window with blinds. A sign on the wall reads "Open Space & Recreation".
